Business setup & customer message

The business gets the chatbot ready once; after that, every new Instagram message is picked up automatically and duplicates are skipped.

Version 1.0
Prepared for client review

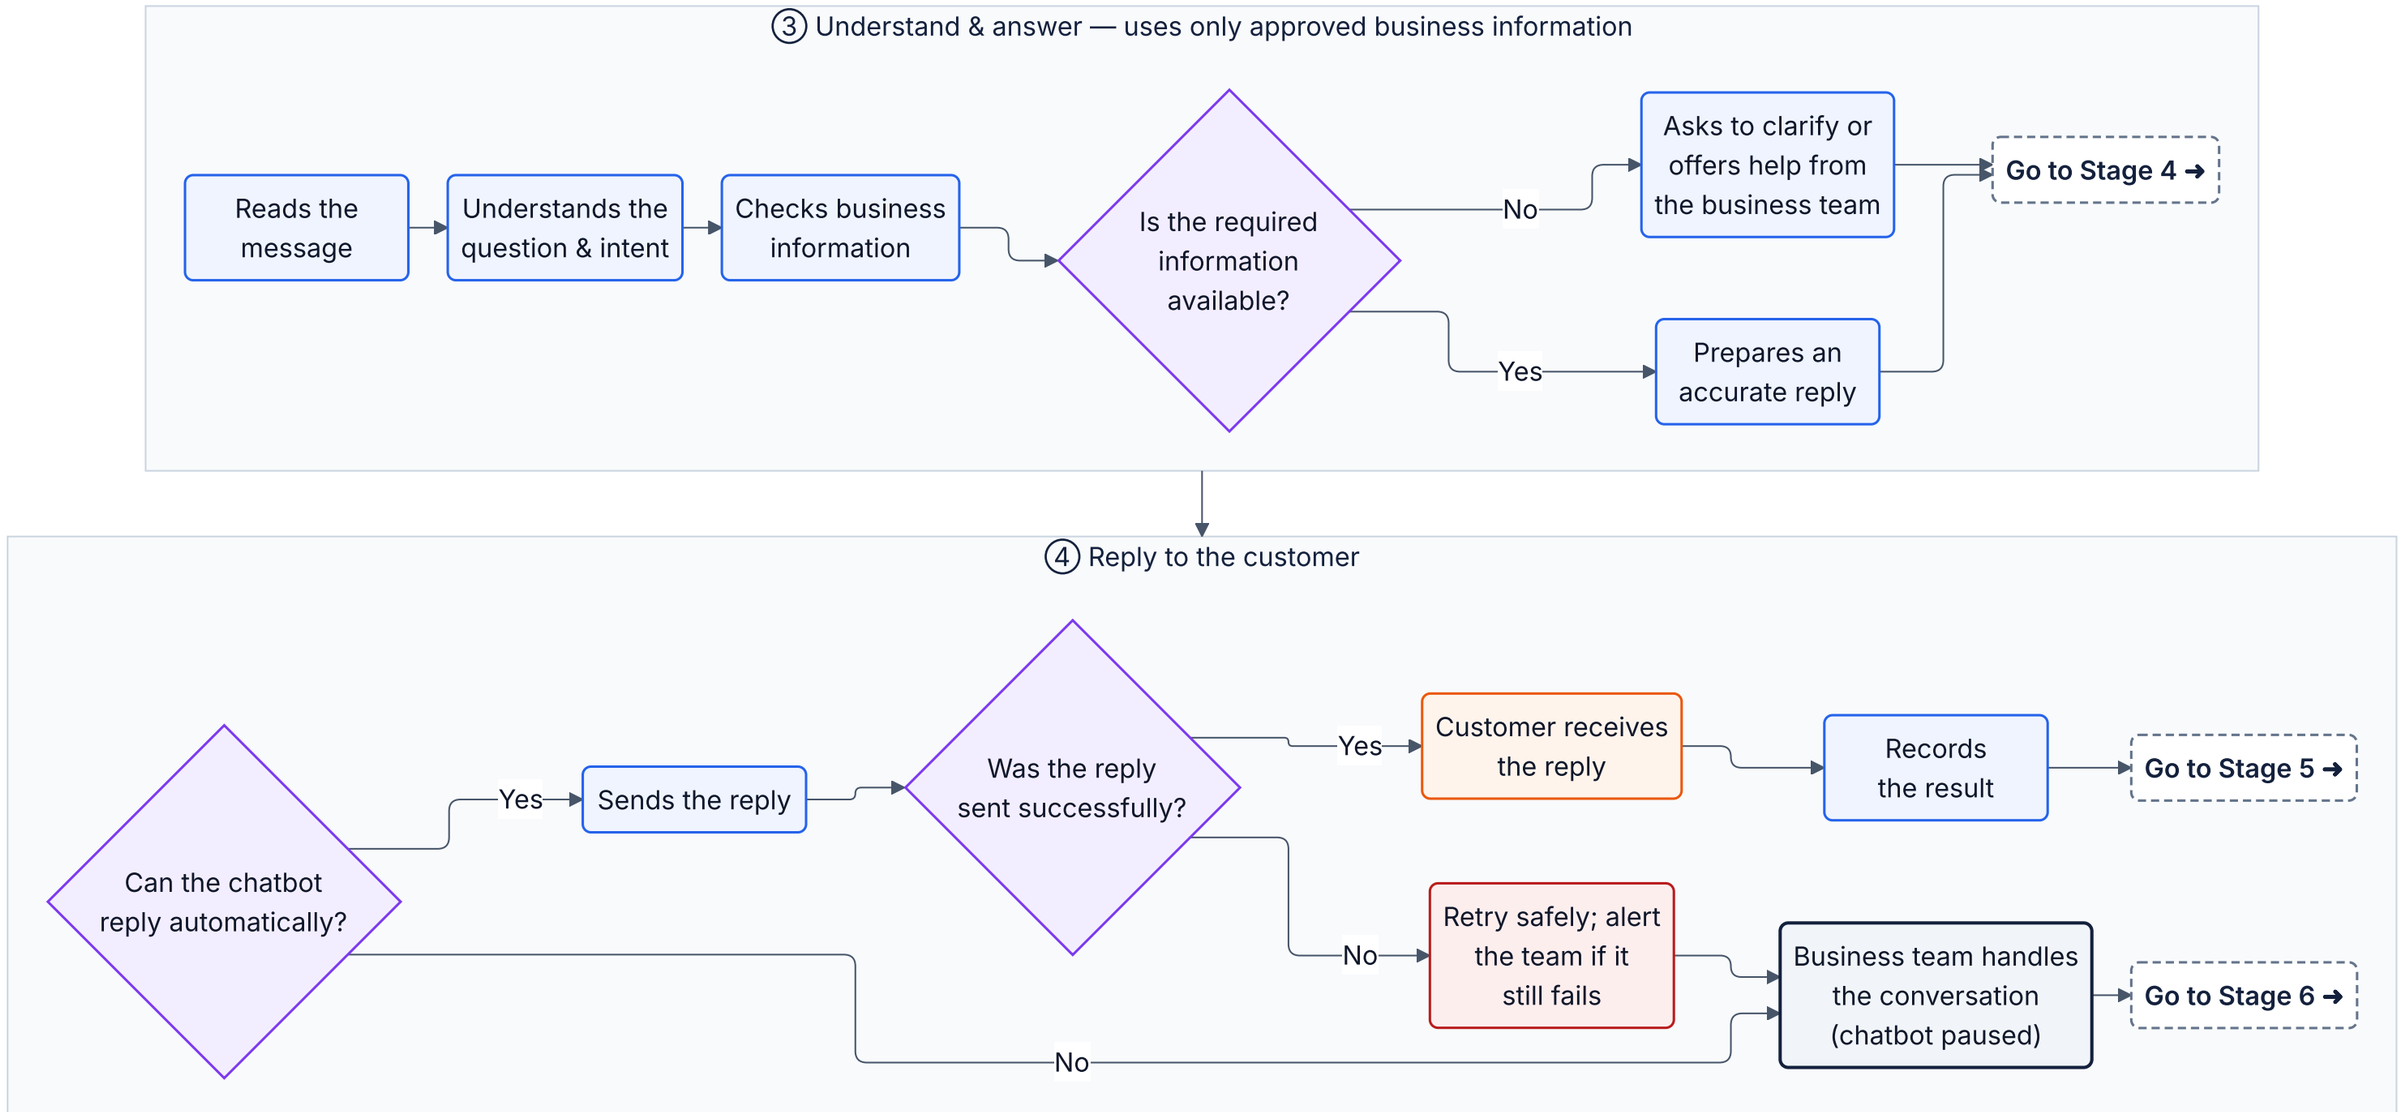

Start · Chatbot action · Customer action · Business / sales team action · Decision (labelled branches) · Successful outcome · Error or blocked action · Continues in another stage · Direction of flow

Understanding & replying to the customer

The chatbot answers only from approved business information — it never invents prices, discounts, availability or policies. The customer gets a reply only when sending succeeds.

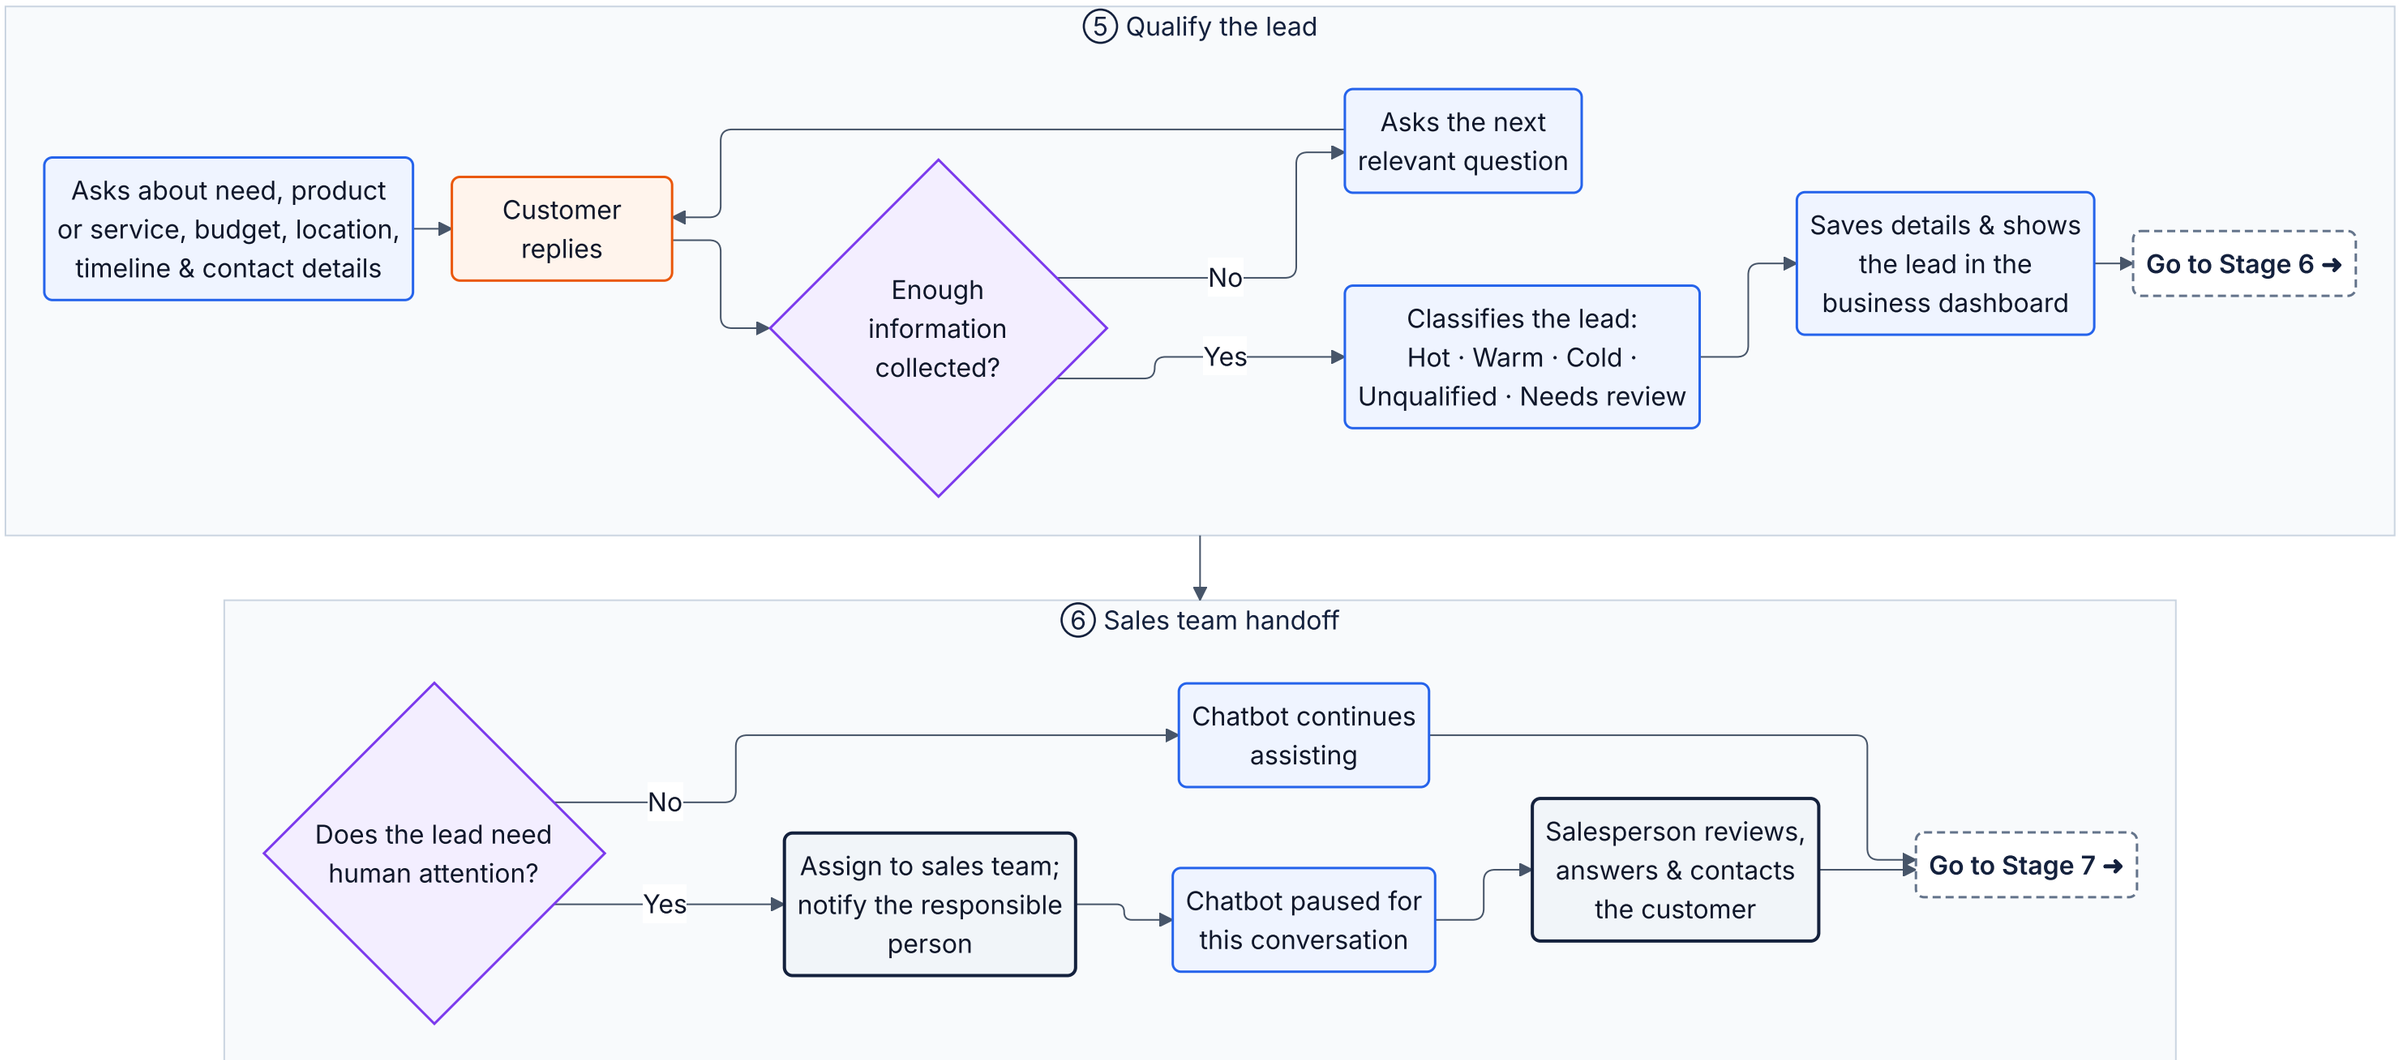

Version 1.0
Prepared for client review

Lead qualification & sales team handoff

The chatbot asks a few relevant questions, classifies the lead and passes it to the sales team when a person is needed. The chatbot pauses while a person handles the conversation.

Version 1.0
Prepared for client review

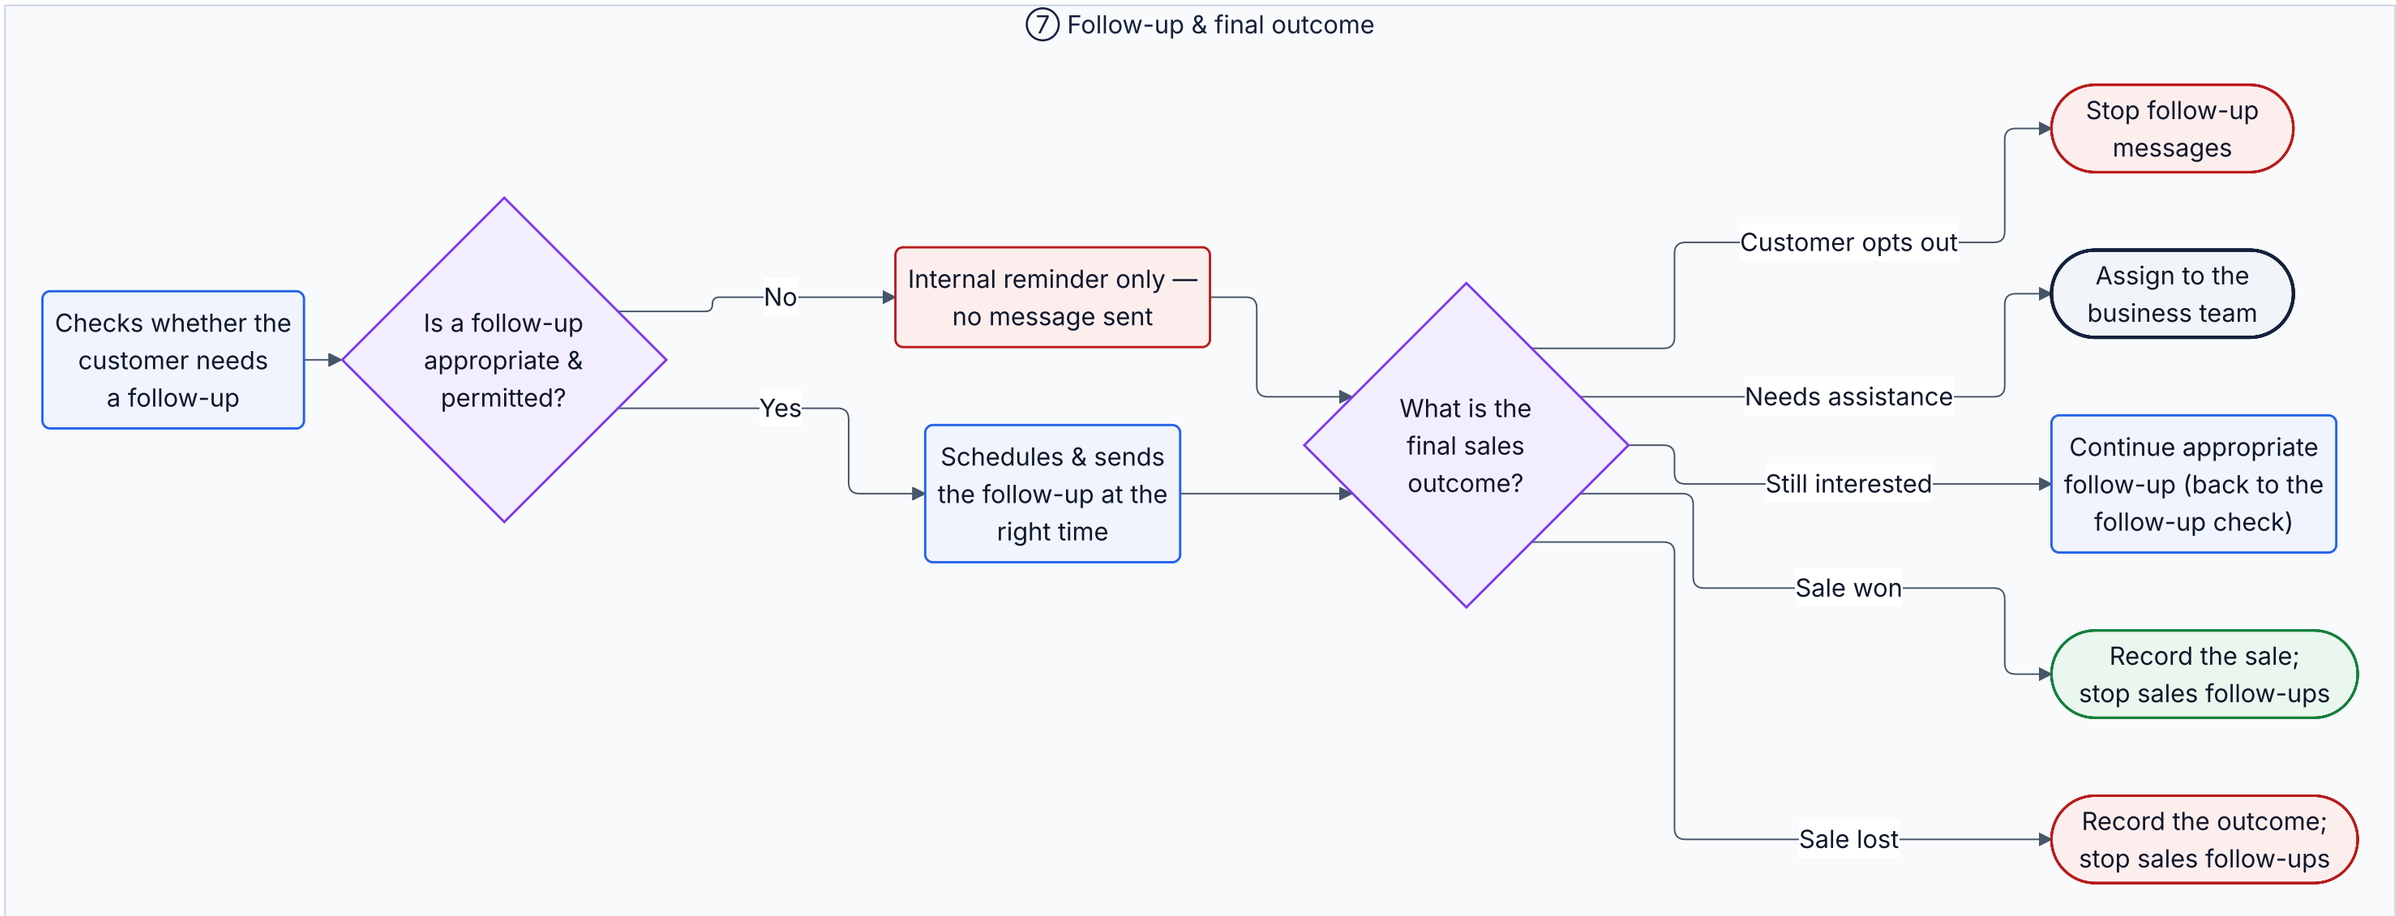

Start · Chatbot action · Customer action · Business / sales team action · Decision (labelled branches) · Successful outcome · Error or blocked action · Continues in another stage · Direction of flow

Follow-up & final outcome

Follow-ups are sent only when appropriate and permitted. Every path ends in a clear outcome, and follow-ups stop once the sale is won, lost or the customer opts out.

Version 1.0
Prepared for client review

Start · Chatbot action · Customer action · Business / sales team action · Decision (labelled branches) · Successful outcome · Error or blocked action · Continues in another stage · Direction of flow
